

SSO Accelerator

Taking Your SSO to the Next Level

Top-performing Shared Services Organizations (SSOs) have more efficient staffing and operate at a large cost advantage. ScottMadden's research shows that top-performer staffing levels are 1.6 to 4.8 times more efficient, and operating costs are 20-40% that of peer organizations. To join the ranks of top performers, continuous improvement of your service delivery model is critical. Before you can improve, you need to assess your SSO, identify gaps between current performance and leading practices, and determine the potential for growth.

The SSO Accelerator

ScottMadden offers a proven SSO Accelerator to help you identify a roadmap for improvement. The first step leverages ScottMadden's tools for research and analysis of your organization. This includes conducting a work activity assessment and customer satisfaction survey to quickly pinpoint areas for immediate improvement. We also review all aspects of your operation from structure to your processes to your technologies and data. Next, ScottMadden assesses your operations against benchmarks and its proprietary leading practice database built from years of research and experience working with top-performing SSOs. Finally, ScottMadden's implementation experience makes us uniquely equipped to identify and cater improvement opportunities to your situation.

DATA COLLECTION AND ANALYSIS

We conduct an in-depth analysis of your organization's current scope of services, your people and organization, policies and processes, tools and technologies, and the way you leverage data and knowledge.

LEADING PRACTICE AND BENCHMARK COMPARISON

We then analyze your organization's operations as they compare to leading practices and benchmarks within the industry.

OPPORTUNITY IDENTIFICATION

Key Recommendation	Business	People	Process	Technology	Market	Long Term Value
1. Evaluate a Process Roll-out Strategy	Process	People	Technology	Market	Process	Quick Win
