

ScottMadden Releases Fall 2015 Energy Industry Update

Strange Brew: Adapting to Changing Fundamentals

ATLANTA, GA – (September 15, 2015) – ScottMadden, Inc., one of North America’s leading energy consulting firms, recently released [The Energy Industry Update](#). This highly anticipated semi-annual report will give you bottom-line insights, distill recent events, and help you as you prepare for emerging trends.

Themed “Strange Brew: Adapting to Changing Fundamentals,” this Update examines a broad array of strategic issues, including:

- A review of the trends in the community solar market, the different models for its deployment, and the long-term outlook for community solar in the United States
- Insights drawn from the just-released U.S. Environmental Protection Agency (EPA) Clean Power Plan reducing emissions of CO₂ from existing power plants—the significant changes from the proposed rule and their implications
- A view of the NY Reforming the Energy Vision (REV) initiatives—where NY is headed, the key issues being addressed, and what REV may mean for our industry

“Grid transformation is moving to the forefront, some regulators are rethinking the hundred-year-old regulatory compact, and advancing technologies are creating new possibilities. This is indeed a ‘strange brew’ of uncertainty, change, and shifting fundamentals. It is an exciting time for the industry and all of us in it,” said [Greg Litra](#), partner and energy, clean tech, and sustainability research leader at ScottMadden.

For more than a decade, the ScottMadden Energy Industry Update has served as a catalyst for strategic discussion, debate, and decisions. Thousands of industry leaders rely on it for the most important trends and thought-provoking insights. To download the latest Energy Industry Update, please [click here](#).

About ScottMadden’s Energy Practice

We know energy from the ground up. Since 1983, we have been energy consultants. We have served more than 300 clients, including 20 of the top 20 energy utilities. We have performed more than 2,400 projects across every energy utility business unit and every function. We have helped our clients develop strategies, improve operations, reorganize companies, and implement initiatives. Our broad and deep energy utility expertise is not theoretical—it is experience based.
