

## **ScottMadden Reviews Organizational Benchmarking Study for Generation and Transmission Staffing with GTC and ODEC**

**ATLANTA, GA – (June 28, 2016)** – ScottMadden, Inc., one of North America’s leading energy consulting firms, recently presented at the Generation and Transmission (G&T) Accounting and Finance Association’s annual conference in Charleston, SC. This four-day event, hosted by Central Electric Power Cooperative, Inc., offered a platform to engage with finance and accounting professionals from G&T cooperatives from around the United States to discuss recent events and trends affecting the industry.

During the event, [Todd Williams](#), partner and fossil practice co-leader at ScottMadden, and Quentin Watkins, manager at ScottMadden, reviewed a recent organizational benchmarking study of G&T staffing. This study examined staffing levels for non-operational positions, focusing on how many full-time equivalents G&Ts require to complete functional area workload. This session, featuring presenters from Georgia Transmission Corporation (GTC) and Old Dominion Electric Cooperative (ODEC), offered unique considerations, highlighted lessons learned, and examined how results were used.

“It was a privilege to present at this conference which brings together G&T finance and accounting leaders from across the country. Attendance has grown over the years from a core group of G&T Accounting and Finance Association members to an expanded audience with additional industry experts and professionals,” said Mr. Williams. “This event provides an excellent window into the many issues and industry developments that are important to G&Ts, and the agenda included a rich variety of timely and relevant topics of interest to the industry,” added Mr. Watkins.

### **About ScottMadden’s Energy Practice**

We know energy from the ground up. Since 1983, we have been energy consultants. We have served more than 300 clients, including 20 of the top 20 energy utilities. We have performed more than 2,400 projects across every energy utility business unit and every function. We have helped our clients develop strategies, improve operations, reorganize companies, and implement initiatives. Our broad and deep energy utility expertise is not theoretical—it is experience based.
